83787

ELECTRICAL WORLD:

A WEEKLY REVIEW OF CURRENT PROGRESS IN ELECTRICITY AND ITS PRACTICAL APPLICATIONS.

VOLUME XXXII.

FROM JULY 2 TO DECEMBER 31, 1898.

NEW YORK:

THE W. J. JOHNSTON COMPANY,

9 MURRAY STREET.

INDEX TO VOLUME XXXII.

GENERAL ALPHABETICAL INDEX.

NOTE.—*Entries from the Digest of Current Electrical Literature are indicated by D. (Digest) and D. R. (Digest Reference). Illustrated articles are indicated by *.*

A

Accumulator factories, Rules for, (D. R.) 602.
Accumulator meter. By Aron, (D.) 76.
Accumulators.
  Action of. By Hoppe, (D.) 540.
  Ammonium chloride. By Stine, (D.) 328.
  Charging for telegraphy. By Brunelli, (D.) 97.
  Comparison of. By Shoop and Benndorf, (D.) 511, 602.
  Concentration of the acid in. By Dolezalek, (D.) 143.
  Construction of. By FitzGerald, (D. R.) 143, (D.) 246, 728.
  Development and applications. By Appleton, (D.) 246, 270.
  Diffusion in. By Juman, (D.) 351.
  Elevated railroad, Chicago. By Cravath, (D.) 423.
  Fulmen, Hospitalier's tests, (D. R.) 189.
  G. m. b. H. by a Berlin Co., (D.) 143.
  Increased use of, for three years, 178.
  Marquand, Description of, (D.) 480.
  Motor vehicle. By Reyval, (D.) 661, 728.
  Rapid-charging curves for. By Girault, (D.) 540.
  Restoring sulphated plates, (D.) 511.
  Sulphating of negative accumulator plates. By Juman, (D.) 188.
  Testing of, (D.) 602.
  Tests, Periodic, (D. R.) 143.
  Theory of. By Dolezalek, (D.) 351, 511, 632.
  Tudor accumulator. By Gebhard, (D.) 10.
  Voltage calculation. By Fitz-Gerald, (D.) 661.
  Werner system, (D. R.) 270.
  (See also Central stations, Railways, Electric.)
Acetylene, Union Carbide Co., Sault Ste. Marie, Mich., 130*, 131.
Actinometer, Electrochemical. By Rigollot, (D.) 143.
Aerial electric railway, Langon system, (D.) 398.
Air under powerful electric stress. By Trowbridge, (D.) 212.
Alkali manufacture, Hargreaves-Bird process, (D.) 564.
Alkaline chlorides, Electrolysis of. By Wohlwill, (D.) 269; Winteler, (D. R.) 269, 633; Kellner, (D. R.) 291.
Alternating-current connections, (D. R.) 212.
Alternating-current machinery. By Houston and Kennelly, 533, 627, 684.
Alternating-current meters. By Heap, (D.) 399*.
Alternating currents.
  Calculations of. By Lyle, (D.) 479, 602, 660.
  Frequency.
    Changing, Method of, Bradley patent, 688.
    Methods of determining. By Kinsley, 342, (D.) 292.
  Graphical calculation of, (D.) 539. Guye, (D. R.) 373.
  Nomenclature. By Feldmann, (D.) 510.
  Oscillations, Determining period of. By Webster, (D.) 17.
  Rectifying currents. By Janet, (D.) 141, 373.
  Theories of. By Rhodes, (D.) 449.
Aluminum.
  Conductivity of. By Northrup, 598.
  Plating, various recipes, (D. R.) 75.
  Production and uses, (D. R. 96.
    at Foyers, (D. R.) 511.
    at Milton. By Ristori, (D.) 188.
  Researches by Goldschmidt, (D. R.) 78, 481.
  Rival of copper and brass for conductors. By Hunt, (D. R.) 245; Felten and Guilleaume, (D.) 398.
Aluminum conductors, Niagara Falls. By Dunlap, (D.) 165.
Aluminum electrodes. By Wilson, (D.) 142, 165, 188.
Ambroine, an insulating material, (D. R.) 49.
American Association for the Advancement of Science, Report on standards of measurement, 421.
American Electric Telephone Co., 693.
American Electric Vehicle Co., 489.
American Electric Telephone Co., 513.
American Institute of Electrical Engineers.
  Co-operative research, 591*.
  Omaha meeting, 32.
American Shearer Mfg. Co., 54.
American Street Railway Association, Convention at Boston, 227, 281, 286, 293*.
Ammonium amalgam. By Pocklington, (D.) 188.
Ampere balance. By Ayrton and Jones, 657, (D.) 633.
Anchor Electric Co., 247, 429, 568.
Anderson Mfg. Co., 122, 297.
Arc lamps.
  Aluminum, 658, (D.) 659.
  Brush improved, 376*.
  Carboning of. By Clarke, (D.) 244.
  Continuous globe enclosed, 693*.
  Cotsworth, (D. R.) 74.
  Duflos system, (D.) 422.
  Focusing, Improved, 378*.
  Handling of enclosed. By Hallberg, (D.) 95.
  Heat compensator, Koerting and Mathiesen, (D. R.) 211.
  Improvements in. By Richard, (D. R.) 74, 536.
  Miniature enclosed, 330*.
  "Monarc," Anderson Mfg. Co., 122*.
  Morris enclosed constant potential, 217*.
  Overhanging, Rules, in London, (D.) 46.
  "Petite" enclosed, 489*.
  Portable marine, 428*, 665*.
  Power circuit, 542*.
  Regulating methods, (D.) 599; By Weil, (D. R.) 94.
  Regulator without a clutch, 395*.
  Souga system, (D. R.) 422.
  Sterling enclosed, 190*.
  Submarine, 428*, 665*.
  220-volt enclosed, 607*.
Arc light circuits, Testing. By Markland, (D.) 325, 371; Stevens, (D.) 396.
Arcs.
  Aluminum electrodes. By Lang, (D. R.) 187.
  Continuous current in the alternating arc. By Eichberg and Kallir, (D. R.) 478, 632.
  Drop of potential in. By Mrs. Ayrton, (D.) 396, (D. R.) 448.
  Electrical properties of arc vapors. By Merritt and Stewart, (D.) 479.
  Measuring the length of, (D.) 329.
  Photometry of the enclosed alternating arc. By Matthews, Thompson and Hilbish, 368.
  Properties of the vapors from the carbon arc. By Merritt and Stewart, (D.) 291.
  Researches with arcs, (D. R.) 141.
  Telephone phenomenon. By Holsten, (D.), 75.
Armature bolts, Insulating. By Boucherot, (D. R.) 46.
Armatures.
  Balancing the distribution of current in parallel-wound armatures, 440*.
  Calculation of. By Poole, 555.
    Air space reluctance for toothed armatures, (D. R.) 422.
    Continuous-current machine. By Grassi, (D. R.) 630.
  Energy in short-circuited armatures. By Roessler, (D.) 599, 630.
  Magnetization, (D.) 211.
  Multiple-wound, Balancing distribution of current, 552.
  Selection of types of cores and windings. By Rice, (D.) 689.
  Self-induction, Reduction of, 185*.
  Teeth, Straight v. T, (D.) 325.
  Windings.
    Forced windings, (D. R.) 94.
    Multipolar windings. By Rice, (D. R.) 211, 325; Stone, (D. R.) 422.
    Sayers windings, 156*.
    Telescope windings. By Rice, (D.), 536.
Army, Use of X-rays in. By Sayen, 467.
Ashton Valve Co., Exhibit, 296*.
Association of Edison Illuminating Companies, Meeting, 321.
Association of Railway Telegraph Superintendents of America, Convention, 4.
Associations. (See Directory of scientific societies.)
Aurora.
  Altitude of. By Abbe, (D. R.) 48.
  Origin of the. By Stuart-Smith, (D.) 142.

B

Baker & Fox, 378.
Balloon signaling, Electric. By Bruce, (D.) 425, (D. R.) 481.
Bases and acids, Affinity of. By Hollard, (D.) 291.
Batteries.
  Badt hermetic cell, 354*.
  Bichromate cells, Efficiency tests of. By Gratz and Schwecke, 12*.
  Calcidum in Leclanché cells, (D.) 374.
  Clark cells on closed circuits. By Wulf, (D. R.) 144.
  Comparison between charging a secondary cell at constant potential and at constant current. By Cahen and Donaldson, 366.
  Daniell standard cell. By Grotrian, (D.) 270*.
Batteries. (Continued.)
  Dependence of the E. M. F. on thermo-electric data. By Platner, (D.) 213.
  Dry cell, How to make, (D. R.) 424.
  Electrolytic cell, Efficiency of. By Burgess, 686*.
  Electromotive force of an asymmetrical arrangement of cells. By Luby, 656.
  Electromotive force of standard cells. By Taylor, (D.) 481.
  Galvanic, Theory and construction. By Platner, (D. R.) 511.
  Jacques carbon. By Langley, (D.) 291; Skinner, (D.) 511.
  Leyden jar of variable capacity. By Leduc, (D.) 328.
  One-volt standards, (D.) 97.
  Primary.
    New. By O'Keenan, (D.) 479.
    Tests of, for lighting purposes (D. R.) 246.
    Utility of, (D.) 213.
  Primo-secondary dry, 274.
  Renewing dry batteries, 73.
  Rowbotham primary, (D.) 188.
  Sampson semi-dry battery, 120.
  Transition cell. By Cohen, (D.) 214, 374.
  Weston and Clark cells, Combination of. By Jaeger and Kable, (D.) 351.
  Weston standard cell. By Kohnstamm and Cohen, (D.) 375.
Bells, Electric. By Ebel, (D.) 540.
  Magneto, of new design, 146*.
  Rousseau, improved, 665*.
  "Straight line" iron frame, 609*.
Belt dressing, "Cling-Surface," 120*.
Belts, Electric, as cures for diseases, 347.
Bernard Co., E. G., 481, 729.
Beryllium, Electrolytic production. By Lebau, (D.) 374.
Bibber-White Co., 298, 301.
Bicycle lamp, Electric, 170*.
Billings & Spencer Co., Exhibit, 295*.
Binding post, Williams, 541*.
Biographical sketches.
  Clark, Latimer, (D. R.) 603.
  Faure, Camille A., 447*.
  Hammond, Robert, (D. R.) 539.
  Kennedy, A. P. W., (D. R.) 539.
  Manville, E., (D. R.) 539.
  Parshall, H. F., (D. R.) 539.
  Preese, W. H., (D. R.) 166.
  Summers, C. H., (D. R.) 603.
Bismuth, Thermomagnetic properties. By Everdingen, (D.) 328; Defregger, (D.) 328.
Bit stock, Meister, 54*.
Blast furnace power gas, 7. By Hubert, (D.) 46; Greiner, (D. R.) 95; Booth (D.) 397; Savage, (D. R.) 423; Witz, (D.) 536.
Bleaching, Electrical, (D.) 424.
Bleaching powder, Hargreaves-Bird process of production, 134.
Blind, Electric device for enabling them to read. By Turine, (D.) 329.
Bliss, E. W., & Co., 122, 247.
Block systems in France. By Walzel, (D. R.) 451.
Boiler tube cleaner, Ball bearing, 272*.
Boilers, Blackpool and Fleetwood electric railway, 346*.
Book reviews.
  Alternating-current, Wiring and Distribution. W. L. Emmet, 634.
  (The) Arithmachinist. Henry Goldman, 426.
  Atlantic Cable Directory of Registered Addresses, 166.
  Commercial Cuba. W. J. Clark, 376, 634.
  Cure of Writers' Cramp and the Arm Troubles of Telegraphers and Ball Players. S. H. Monell, 426.
  Discharge of Electricity through Gases. J. J. Thomson, 376.
  Distribution de l'Energie par Courants Polyphases. J. Rodet, 271.
  Electrical Testing for Telegraph Engineers. J. E. Young, 376.
  Elements of Sanitary Engineering. Mansfield Merriman, 634.
  Engineering Contracts and Specifications. J. B. Johnson, 634.
  Handbook of Corliss Steam Engines. F. W. Shillito, Jr., 426.
  Harper's Scientific Memoirs, 634.
  Indicator Handbook. C. N. Pickworth, 376.
  Laboratory Manual of Electro-Therapeutics. W. J. Herdman and F. W. Nagler, 425.
  La Traction Electrique sur Voies Ferrés. Andre Blondel and F. Paul-Dubois, 215, 634.

Book reviews. (Continued.)
Lecture Notes on the Theory of Electrical Measurements. W. A. Anthony, 451.
Matter, Energy, Force and Work. S. W. Holman, 634.
Metric System of Weights and Measures, 634.
Patented Telephony, 634.
Poor's Manual of Railroads, 426.
Street Railway Roadbed. M. D. Pratt and C. A. Alden, 271.
Submarine Telegraphs: Their History, Construction and Working. Charles Bright, 425.
Twentieth Century Magic. N. M. Hopkins, 634.
Wireless Telegraphy Popularly Explained. Richard Kerr, 425.
Boosters, Switching and controlling apparatus, 705.
Brakes.
Ingenious electric brake, 535.
Modified prony brake. By Wettler, (D.) 425.
Steep grade, Swiss railways, (D.) 163.
Braking, in single-phase induction motors. By Eichberg, (D.) 630.
Brazing furnaces and tools. By Fells, 159*.
Bridges.
Brooklyn Bridge. Overhead switches, 255.
Electric power for, Budapest, (D.) 536.
Motor-driven swing bridge, 352. By Kidde, (D.) 562.
British Association for the Advancement of Science, 346.
Brooklyn Edison Co., New York, 579*.
Brush holders, Some modern, 87*.
Buffalo Forge Co., Exhibit, 272*.
Burglar alarm window and door springs, Rousseau, 301*.
Burton Electric Smelting Co., 217.

C

Cables.
Long-span, Walen Lake, Switzerland. By Preller, (D.) 215.
Tests of submarine cables. By Murphy, (D.) 246.
(See also Telegraph cables.)
Cableway over Chilkoot Pass. By Burkholder, (D.) 478.
Cadmium, Electro-deposition of. By Cowper-Cowles, (D.) 510.
Cadmium amalgam, Electro-motive action of. By Jaeger, (D.) 270.
Cahill & Hall, 514.
Calcium, Production of. By Moissan, (D.) 246.
Calcium carbide.
Impurities of. By Moissan, (D. R.) 540.
Ingleton plant. By Matthews, (D.) 374, (D. R.) 399.
Manufacture of. By Nicolai, (D.) 661.
In Europe and America, (D.) 188.
Union Carbide Co., Sault Ste. Marie, Mich., 130*, 131, (D. R.) 211.
Calhoun County Telephone Co., 696.
Canadian Electrical Association, Convention, 43, (D. R.) 17, 144.
Canal towage, Electric, 386; By Galliot, (D.) 562, 727; Allen, (D.) 631.
Capacity, Dependency of, on the frequency. By Hanauer, (D.) 632.
Capillary electrometer. By Burgess, (D.) 328; Fanin, (D.) 328.
Capitol building, Washington, Electric plants. By Washington, Jr., 265*.
Capstans, Electrically operated, France, (D.) 46, (D. R.) 562.
Car lighting.
Dick system, Austria, (D. R.) 139.
Dynamo on axle, (D.) 422.
Electric systems, 522.
Carbide furnace, Memmo system, (D. R.) 540.
Carbolite, Hartenstein invention, (D.) 693.
Carbon brushholders, (D.) 478.
Carbonic acid, Electrolytic and photolytic reduction. By Bach, (D.) 374.
Carbons.
Henrion, Resistance of, (D. R.) 478.
Manufacture of. By Jehl, (D. R.) 144, 481.
Strauss patent, (D.) 94.
Carborundum, Manufacture of, (D. R.) 246.
Carlisle & Finch Co., 55.
Cars, Electric.
Double-truck v. single-truck, (D.) 290.
Equipment and maintenance of. By Hopkins, 284.
Inspection and testing of car equipments. By Perkins, 283.
Large street car units. By Brill, (D. R.) 75.
Special, in Brooklyn, (D.) 537.
Cathode rays. By Jaumann, (D.) 141; Wehnelt, (D. R.) 449.
Anode rays. By Sandrucci, (D.) 47.
Bipolar discharge. By Wien, (D.) 141.
Crookes cross. By Villard, (D.) 373.
Current paths. By Wiedemann and Wehnelt, (D.) 373.
Dark cathode space. By Wehnelt, (D.) 187.
Deflection of rays. By Kaufmann, (D.) 141.
Dispersion of rays, Magnetic. By Geitler, (D. R.) 373.
Effect of rays on gems, (D.) 142.
Emission theory. By Lenard, (D.) 269.
Experiments. By Villard, (D.) 16.
Interference and electrostatic deflection. By Jauman, (D. R.) 96.
Jet formations. By Phillips, (D.) 164.
Magnetic deflection of diffusely reflected rays. By Merritt, (D.) 291.
Mutual repulsion of cathode beams. By Wiedemann and Wehnelt, (D.) 373.
Nature of rays. By Walter, (D.) 632.
Obscure cathode region. By Wehnelt. (D. R.) 510.
Radiation of rays. By Swinton, (D.) 47, 96.
Ratio of charge to mass of iron. By Schuster, (D.) 373.
Reflection of rays. By Starke, (D.) 632.
Rotation of rays. By Braun, (D.) 119.
Cathode rays. (Continued.)
Structure of light. By Goldstein, (D. R.) 141.
(See also Röntgen rays.)
Cells. (See Batteries.)
Central stations.
Accumulators. By Rider, (D.) 118; Davenport, (D.) 212.
Fribourg, (D.) 47.
Paris, Large installation, (D.) 691.
San Francisco Edison plant. By Low, (D.) 350.
Akron, Ohio, New plant, (D. R.) 289.
Alternating-current, Profits of. By Meston, 597.
Baltimore. By Fairchild, (D. R.) 96.
Belfast municipal plant, 504*.
Berlin, Financial features, (D. R.) 141.
Boston Electric Light Co., 523*.
Brighton, Breakdown, (D.) 538, 563, 600, 631; By Philip, (D.) 660; Quinn, (D.) 690; Fleming, (D.) 727.
Bristol, Eng., Auxiliary plant. By Proctor, (D.) 398.
Brooklyn Edison Co., 579*.
Chicago, Harrison St. station, (D. R.) 601.
Christiania, Tabular reports, (D. R.) 372.
Costs. (See below, Economy; also, Charging for electrical energy.)
Creusot plant, (D. R.) 139, 163.
Designing mechanical portions. By Appelbee, (D. R.) 289.
Detroit, Mich., Cost of municipal lighting, 162, (D.) 326.
Economy (D.) 448; By Summerfield, (D. R.) 15.
Controlling high voltages, 577.
Direct currents, General distribution by. By Ferguson, 7, (D. R.) 245.
Division of units in a plant, (D.) 510.
Fuel waste. By Bruton, (D. R.) 600.
Limit of the power of generating stations, 153.
Meter's relation to the dividend. By Haskins, 237.
Multiphase system for central stations. By Kelley, (D.) 372.
Possibilities of gas plants. By Poole, (D. R.) 563.
Profits and loans. By Maclay, (D. R.) 47.
Profits of alternating-current stations. By Meston, 597.
Single v. multiple generating stations. By Snell (D.) 15.
Small plants. By Roberts, (D. R.) 601.
Subdividing central stations, (D.) 478.
Three-wire v. high-potential system. By Wagner, (D.) 96.
220-volt system. By Gray, (D. R.) 141.
Uniformity in plant and apparatus. By Nordingham, (D.) 47, 75, 119; Modulus, (D.) 95.
Edinboro'. By Newington, (D.) 119.
England.
Cambridge, Analysis of accounts, (D. R.) 47.
Cost of Energy in English stations for 1897. By Haslam, (D.) 372.
Great Yarmouth, Analysis of accounts, (D. R.) 47.
Imperial Tramways Co., Bristol, 137*.
Legislative control, (D. R.) 15.
Evolution in central station practice. By Scott, (D.) 510.
Folkestone, Eng., (D. R.) 601.
French Alps, Statistics, (D.) 212.
Fribourg, (D.) 47.
Furnace for burning refuse, (D.) 74.
Germany, Statistics, (D.) 118.
Hackensack, Polyphase plant, (D.) 539.
Hamburg, Report, (D. R.) 601.
Hull and Folkestone, Eng., 585*, (D.) 539.
Llandudno, (D. R.) 539.
London.
Hammersmith station accounts, (D. R.) 15.
Islington, Analysis of accounts, (D. R.) 75.
St. James, Analysis of accounts, (D. R.) 95.
Madrid, (D. R.) 212.
Manchester, Three-phase extensions of continuous-current plants, (D.) 245.
Mechanicsville, N. Y., Regulation of plant, 341*.
Metropolitan St. Ry. Co., New York, 254, 258*.
Morley, Alternating-current, (D. R.) 95.
New Egypt, N. J., Two-wire, 220-volt system. By Foulks, 416.
New York, Met. St. Ry. Co., (D. R.) 538.
Nurnberg. By Scholtas, (D. R.) 563, 600.
Paris.
Edison station. By Bayly, (D. R.) 96.
Paris Compressed Air Co., 177, 179*.
Place Clichy. By Bayly, (D. R.) 632.
Phil., Union Traction Co., (D.) 538.
Prussia, Statistics, (D. R.) 600.
St. Louis, Imperial Electric Light, Heat & Power Co. By Damon, 36*.
Shoreditch dust destructor, (D.) 631, (D. R.) 659; By Baker, (D.) 509; Kershaw, (D.) 536.
Standardizing electric plants, (D.) 186.
Switzerland, Statistics, (D. R.) 423, (D.) 603.
Testing power plants, Methods. By Benjamin, (D. R.) 600.
U. S., Statistics for, (D.) 350.
Vienna. By Kaula, (D.) 691.
Wakefield, Municipal control, (D.) 75, 119.
Wash., United States Co., (D.) 510; By Hopkins, (D.) 539.
Winchester, (D.) 119.
(See also Isolated plants; Railways, Electric; Transmission plants.)
Charging a secondary cell at constant potential and at constant current. By Cahen and Donaldson, 366.
Charging for electrical energy.
Determining cost of electric supply. By Turner, 209.
Charging for electrical energy. (Continued.)
Edison Co., of New York, (D.) 510.
Manchester, England, 361, 365.
New Method. By Meynier, (D.) 398.
Swiss station, Contract and meter system, (D.) 372.
Time switch method. By Gibbings, (D.) 290.
(See also Meters and names of meters.)
Chemical equilibrium and E. M. F. By Knuepffer, (D.) 511.
Chemistry.
Organic, Electric current in. By Smith, (D.) 450.
Relation to electrical engineering, (D.) 143, (D. R.) 165.
Chicago Peace Jubilee, Electric lighting, 439*.
Chicago public library building, 648*.
Chicago Rheostat Co., 427.
Chlorate Works, France. By Kershaw, (D.) 661.
Chlorates, Electrolytic production. By Vaubel, (D.) 142.
Chloride of calcium solutions, Electrolysis of. By Oettel, (D. R.) 119.
Chlorides, Electrolysis of. By Winteler, (D.) 142.
Chlorine, Bromium and iodine, Quantitative separation. By Specketer, (D.) 16.
Christensen Engineering Co., 299.
Chromium.
Electro-deposition of. By Cowper-Cowles, (D.) 424.
Electromotive properties. By Hittorf, (D.) 119, (D. R.) 143, 165, 373.
Chromium steel. By Placet, (D.) 96.
Circuit breakers.
General Electric, 273*.
Induction coil, (D.) 77; By Margot, (D.) 49.
La Roche, 482*.
Magnetic blow-out, 273*.
Tesla, Production of high-frequency currents, 178, 181*.
Circuit controller for vacuum tube lighting, Tesla, (D. R.) 450.
Cleaning metallic surfaces by electrolysis. By Burgess, 445.
Cleveland Electric Co., 144.
Cling-Surface Mfg. Co., 120.
Clocks, Kessel electric, (D.) 122.
Clonbrock Steam Boiler Co., Exhibit, 272*.
Cloos Electrical Engineering Co., 663.
Coal, Examination by X-rays. By Couriot, (D.) 75.
Coast defense, Electricity in. By Grier, 390.
Electric railway as an auxiliary. By Clark, 342.
Coast signal service in wartime, (D. R.) 481.
Coating non-conductors. By Knothe, (D.) 564.
Coherers. By Rovelli, (D.) 141; Aschkinass, (D. R.) 602.
Action of various waves on. By Leppin, (D.) 632.
Construction of. By Dorn, (D.) 510.
Experiments with. By Arons, (D.) 187.
Marconi coherers. By Blondel, (D.) 350.
Properties of various types. By Pasquini, (D.) 15.
Reactions of. By Leppin, (D.) 350.
Selenium. By Agostini, (D. R.) 691.
Self-adjusting. By Lawrence, (D.) 692.
Theory of. By Van Gulik, (D.) 570.
Coke ovens, Power from, (D. R.) 631.
Commutation of continuous-current dynamos. By Girault, (D.) 94.
Commutators.
Clamping segments, (D. R.) 14.
Design of. By Matthews, (D.) 509.
Potential around, Exploring. By Shepardson, (D.) 422.
Compass, Marine, Geometric theory of. By Ravier, (D. R.) 479.
Condensers.
Capacity of. By Lori, (D.) 450.
Discharge of. By Smith, (D.) 728.
Dissipation of energy in. By Rosa and Smith, (D.) 399.
Induction coil. By Tulbizuno, (D. R.) 189; Dubois, (D.) 270; Dell, (D.) 120, 270, 602.
Paradoxical condenser discharge. By Swyngedauw, (D.) 141.
Conductivity.
Dissociation and conductivity. By Noyes, (D.) 539.
Thermal and electric conductivity. By Straneo, (D. R.) 602.
Conductivity of electrolytes, (D. R.) 374.
Conductivity of mixed solutions. By Hopfgartner, (D. R.) 269; Schaller, (D. R.) 269, 374, 692.
Conductors.
Aluminum, at Niagara Falls. By Dunlap, (D.) 165.
Aluminum v. copper and brass. By Hunt, (D. R.) 245; Felten and Guilleaume, (D.) 398.
Calculation of the joint resistance. By Ross, (D. R.) 214.
Cost of copper, aluminum and iron. By Kershaw, (D.) 326; Zingler, (D.) 350.
Glass as a conductor. By Vosmaer, (D.) 96.
Platinum, without resistance, (D.) 48.
Underground. By Perrine, 62, 69.
(See also Cables; Wires.)
Conductors in electrolytes. By Stark, (D.) 602.
Conduits.
New York subways, 678*.
Submarine, under Boston rivers, 442*.
Conkey printing establishment. By Damon, 499*.
Consolidated Car Fender Co., Exhibit, 300*.
Consolidations and the subways in New York city, 678*.
Contact bar, Sliding. By Stobrawa, (D. R.) 118, 245.
Contact resistance. By Branly, (D.) 212.
Controller blow-out, Lundell, 161*.
Controllers.
Elieson-Naylor, (D.) 186.
"Regenerative." By Henry, (D.) 140.

Conventions.
Announcement of, 107.
Various, 13, 32, 42, 43, 49, 107, 156, 208, 215, 227, 286, 293, 321.
Converters. (See Transformers.)
Copper.
Analysis of copper slimes. By Hollard, (D. R.) 424.
Cost of refining, (D.) 480.
Depositing process at Widnes, Eng. By Kershaw, (D.) 479, 540.
Deposition direct from the ore. By Hoepfner, (D.) 564.
Electrolytic refining, (D.) 510; By Ulke, (D.) 75; Brown, (D.) 564.
Industrial separation of. By Neumann, (D. R.) 450.
Rapid deposits, (D.) 328.
Cranes, Electric.
Overhead traveling. By Hildebran, 55*.
Southampton, (D.) 630.
Crocker-Wheeler Co., 167, 192.
"Current economizer" of von Leon. By Winkler, (D.) 47.
Currents, Electric.
Continuous, Transforming into alternating. By Meyer, (D.) 371.
Continuous current in the alternating arc. By Eichberg and Kallir, (D.) 478.
Continuous-current spectra. By Kalaehne, (D.) 449.
Current at rupture. By Arons, (D.) 212.
Electromagnetic effects of electrolytic currents. By Sheldon and Downing, (D.) 351.
Frequencies in England, 578.
High-frequency.
Effect of soft iron. By Pellat, (D.) 563.
Production of. By Meyer, (D.) 373.
Measuring power of polyphase currents. By Blondel, (D.) 189.
Mechanical corruption of. By Weyde, (D.) 16, (D. R.) 48.
(See also Alternating currents.)
Curve recorder, Alternating current. By Callendar, (D.) 292, 451; Switzer, (D.) 375.
Curves.
Alternating current, Use of simple sine curves, (D.) 350.
Periodic, Analysis of. By Weiss, (D. R.) 450.
Cut-outs, Guillaume magnetic, (D.) 141.
Cutler-Hammer Mfg. Co., 427.
Cutter Electrical & Mfg. Co., 608.
Cyclostat, for synchronizing alternators. By Perkins, 412.

Omnibus Co.'s system, Paris. By Montillot, (D.) 329.
Pacific coast long-distance line, 438.
Paris, Gutenberg street. By Touanne, (D. R.) 120.
Persia, Progress in, (D. R.) 541.
Pittsburg, Bell plant. By Fairchild, (D. R.) 215.
Private plant system, 456*.
Railway systems.
Austria, (D.) 375.
Bernheim system, (D. R.) 292.
Rome systems. By Battandier, (D. R.) 292.
Ship system, Spanish, (D. R.) 144.
Signals, Incandescent lamps. By Abbott, 67*.
Statistics of the world for 1896, (D.) 400, 425.
Sweden, Stockholm Co., (D. R.) 246.
Timing trunk line service, (D.) 352; By Abbott, (D.) 246.
Toll-line systems. By Clausen, (D. R.) 352.
Non-infringing multiple, 483*.
Use of telegraph lines, (D.) 375.
Wash., D. C., Lower rates, 677.
Wilmington, Delmarvia Telephone Co. By Clausen, (D. R.) 77.
Wurtemberg, Statistics, (D. R.) 292.
Zurich station fire, (D.) 603.
Temperature, Measuring from a distance, (D.) 399.
Temperature coefficient of standard coils. By Solomon, (D.) 399.
Tesla, Nikola.
Circuit interrupters, 178, 181*.
Controlling motors from a distance, (D. R.) 562.
Hertz-wave transmission, 466, 527.
Letter to "Electrical Engineer," 552.
Testing sets.
Jagabi portable, 694*.
Portable, for insulation measurements, (D. R.) 17.
Therapeutics, High-frequency currents in. By Tesla, (D.) 603.
Thermo-electric and galvanic actions. By Reed, (D.) 661.
Thermophony. By Braun, (D.) 119, 373.
Thermopiles. By Rubens, (D.) 144.
Electrolytic, Test of Nernst's formula. By Duane, (D.) 669, 691.
Thomas, Judge J. M., President, I. T. A., 13*.
Thorium compounds, Radiators from. By Schmidt, (D.) 269.
Tile bolt and lock, 664*.
Tin, Electrolytic methods. By Cowper-Cowles, (D. R.) 142, 165, 602.
Tools. (See Machine tools.)
Torpedo boats, Electric. By Child, 134.
Electric light on. By Pontifex, (D.) 448.
Track bonding. (See Rail bonds.)
Track construction. By Carver, 344; Gibbon, (D. R.) 423.
Sioux City Traction Co. By Wilson, (D.) 163.
Train resistances, (D. R.) 140.
Transformer equations, Imaginary quantities in. By Pomey, (D. R.) 449.
Transformer litigation, (D. R.) 211.
Transformers. By Steinmetz, 645, 650, 682.
Alternating current, from the station manager's viewpoint. By White, 39.
Buffalo transformer station. By Dunlop, (D. R.) 163.
Cataract Power Co., Hamilton, Ont., 620*.
Connecting. By Keator, (D. R.) 690.

Transformers. (Continued.)
Construction of 150,000 volt. By Paine and Gough, 63*.
Converting multiphase into continuous currents. By Sahulka, (D.) 371.
Cooling, by air blast and natural draft, 18*.
Current rushes in. By Hay, (D.) 291, 327.
Efficiency, Calculating. By Aliamet, (D.) 14.
Fall of voltage, Calculating. By Kapp, (D. R.) 349.
Home-made, (D. R.) 211.
Lakon, 542*.
Leakage of magnetism. By Kapp, (D. R.) 244.
Multiphase, 549, 554*.
Parallel operation, (D. R.) 398.
Phase, Uses of. By Meyer, (D. R.) 448.
Pittsburg Transformer Co., 454*.
Plates, Best thickness of. By Bledell, Klein and Thomson, 723, (D.) 536.
Proper choice of. By Rhodes, (D.) 478.
Regulation of. By Bedell, 364.
Rotary. By Marchena, (D.) 244, 325, 422; Kapp, (D.) 396, 422, 630; Thompson, (D.) 599, 630, 659, 689, 725; Steinmetz, 645, 650, 682.
Royal Electric Co., 428*.
Self-cooled, 121*.
Street railway work. By Bell, (D.) 289.
Testing of, (D. R.) 599.
Three-wire system, (D.) 139.
Variable ratios, Nicolaysen device, (D.) 689*.
Water-cooled, 121*.
Zipernowski-Deri British patent, (D. R.) 244.
Transmission of electric power. By Janet, (D.) 371, 423; Hartmann, (D.) 371; Siemens, (D.) 396, (D. R.) 537.
French government report. By Blondel, (D.) 289.
High voltages, 549; By Bly, (D.) 163; Scott, 557; 592.
